

The background of the entire image is a network diagram. It consists of numerous nodes, represented by circles of varying sizes and shades of black and grey, connected by thin, light grey lines. The nodes are distributed across the frame, with some appearing as large, prominent hubs and others as smaller, peripheral points. The overall effect is a complex, interconnected web of relationships.

COVID FRONTLINE

Connecting people who can help to those who need it the most

Navkiran Singh #TerminalTechTakesOnCovid

PEOPLE IT SEEKS TO HELP

PEOPLE WITH PRE-EXISTING MEDICAL
CONDITIONS WHO NEED REGULAR
MEDICINES

THE POOR – DAILY LABORERS, FACTORY
WORKERS WHO HAVE BEEN LEFT
WITHOUT WORK AND FINDING IT
DIFFICULT TO GET FOOD AND RATIONS

PEOPLE WHO NEED TECHNICAL SERVICES
LIKE PLUMBING, ELECTRICIANS, ETC BUT
CANNOT GET THEM DUE TO LOCKDOWN

All these people are compelled by their circumstances and uncertainty to often violate lockdowns to fend for their needs. This puts them and others at risk.

WHO CAN HELP?

NGOS, VOLUNTEERS AND TECHNICAL WORKERS – they can be put in contact with **LOCAL GOVERNMENT BODIES** like deputy commissioner's office, municipal bodies, etc **of the areas they operate in.**

The local government bodies, in turn, can then decide where to **ALLOCATE THESE PERSONNEL ACCORDING TO NEED.**

OTHER RESOURCES LIKE DONATIONS

Resources like donated money, food, PPEs can sometimes not reach all affected areas.

NGOs might remain restricted to some region while other region is neglected unintentionally.

Similarly volunteers might also focus on a particular region, unaware of areas where their help is needed more.

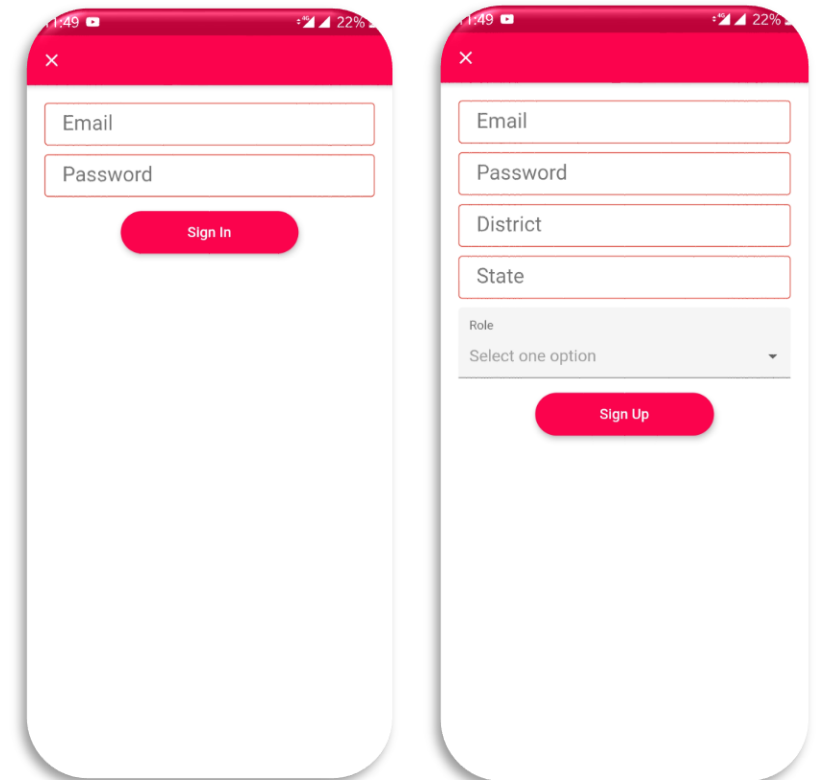

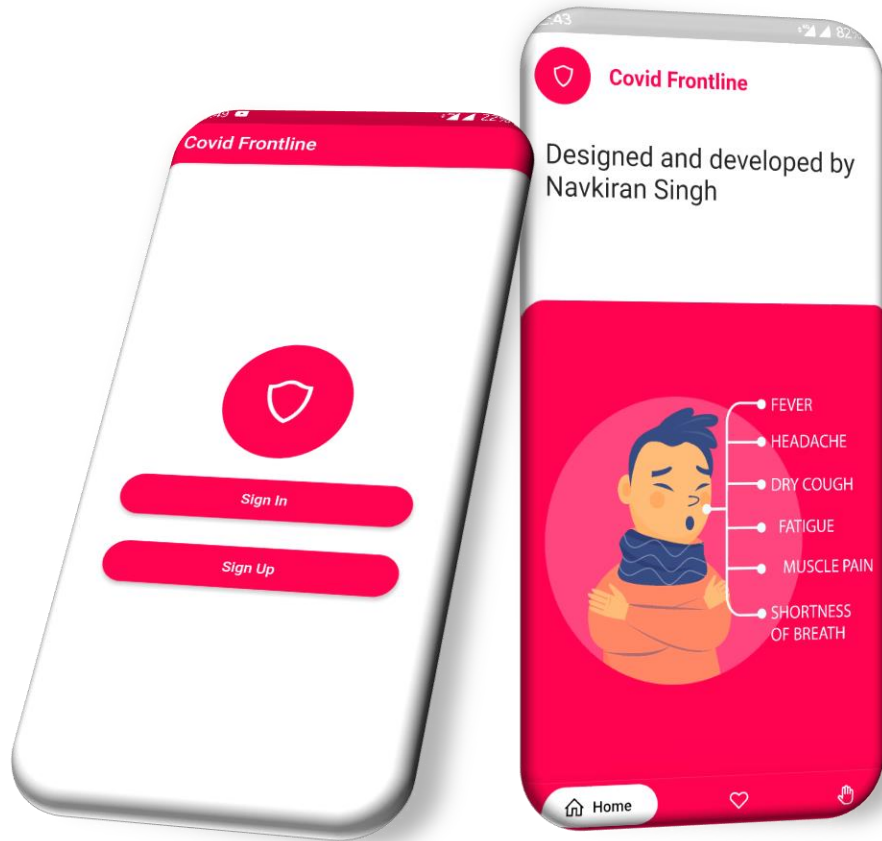

HOW TO BRING THESE PEOPLE AND RESOURCES TO THOSE WHO NEED THEM?

COVID FRONTLINE SEEKS TO BRIDGE THIS GAP – by providing a central system where information about areas in need is available to local governments concerned with that area.

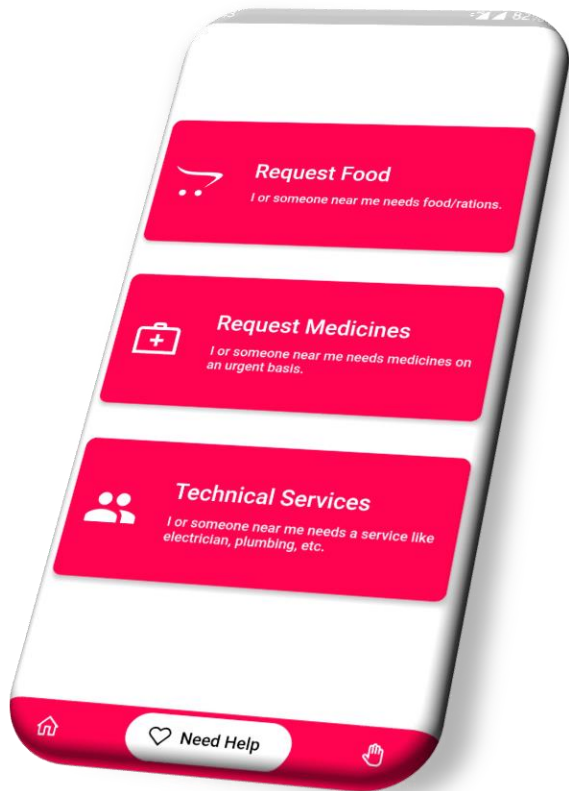

The local government bodies can then allocate resources (supplies and personal) at their disposal more effectively to target areas.
